TELEPORTATION MAGIC: **PILGRIM**

Grimoire and
Magic Circle Designs

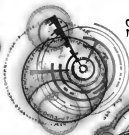

Sorceries have their own exclusive magic circles.
The intensity of the sorceries dictates
how large the circles become.
Low-level sorceries do not require magic circles.

SENTENCED MAGIC CIRCLE

By drawing the magic circle in your
mind and then chanting the words
(incantation), magic is invoked.

The higher level the magic is,
the more complex and larger
the magic circle becomes and
the longer the incantation becomes.

Q&A Corner

■ Kyuss's girly sitting pose in the first half of Chapter 18

■ Is Rose drinking Corona beer in the second half of Chapter 18?

I guess it looks something like Corona, huh? In the restaurant (and bar) that I worked at in the past, I'd put a lime into it.

■ Kyuss dropped by way too soon

He couldn't resist the urge after Astra went back home, so he hopped on a night time Hippogriff carriage.

■ That Kyuss or whatever is a homo yandere

Rather than calling him homo, he doesn't have any friends at all so I think he hasn't grasped how to keep a distance from people yet.

■ I want to know how Astra picked his house

That'll probably be revealed as an important chapter in the latter half of the story.

■ I want to see a drawing of nagashi-somen

How nice! Next time I'll try drawing some in.

■ Wouldn't you agree that if Rose became the Commander, it would be a more upright organization?

Since everyone's strong, they could all fit the job, generally. Probably. Rose is the type who would shine more as an advisor than as a person standing at the top.

■ Will Rose offer another job like the scene earlier?

I'm not sure, but she'll appear again.

Current Status:

Maybe I should
go watch
Mad Max again.
I'm unsure.
